PROGEEEN Construction
COMPANY PROFILE

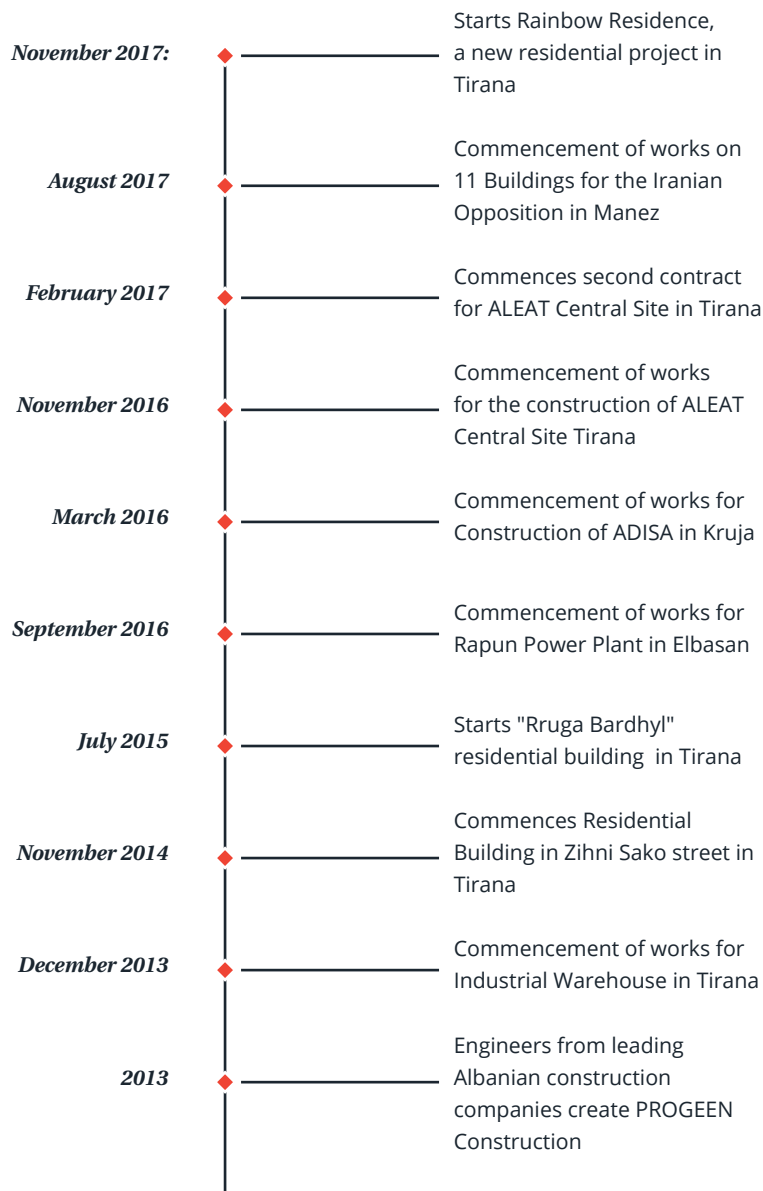

Civil Construction

PROGEEN CONSTRUCTION

ABOUT US

Leading in expertise & quality

The company was founded in 2013 by a group of engineers with a vast relevant experience working in the leading Albanian construction companies in major infrastructural, industrial and civil projects. Some of these projects include: Tirana International Airport, Various Hydro-electrical Power Plants, various Prisons, High Tribunal of Serious Crimes and other infrastructural works like roads, overhead lines etc. In 4 years the company has carried out various civil and industrial projects both as a contractor and an investor with a considerable turnover growth rate.

Here is why we are the best at what we do

#1 — 15 YEARS OF EXPERTISE

It starts before Progeen. Our expertise started through the long experience managing major Industrial and Civilian projects for leading Albanian companies.

#2 — VERSATILITY

Our team of in-house professionals with complementary skills achieve high efficiency in Architectural and Engineering Design as well as in implementation by being available to all project dynamics.

#3 — UNMATCHED ENGINEERING SOLUTIONS

Our staff's vast experience allows us to offer the best engineering solutions for the customer's requirements. During the years we came to learn the best practices, do-s and dont-s for most construction scenarios in the country.

#4 — UNBEATABLE EFFICIENCY

There's always someone cheaper, however cheap is not always a value. We carefully asses our solutions from the early phases of design processes in order to achieve maximum efficiency according to our client's priorities.

WHAT WE DO

OUR SERVICES

Complete solutions

TURNKEY SERVICES

One stop solutions

PROGEEEN houses most of its services in-house and is able to offer complete turnkey solutions which include design, production, construction and other legal or documentation handling like permits, applications etc through various contract types like FIDIC etc.

COMPLETE DESIGN SOLUTIONS

Equipment & Materials

Our design solutions include:

- Architectural design
- Electric design
- Structural design
- Mechanic design
- Hydro-technical design
- Fire-safety system design

CONSTRUCTION WORKS

All typologies

Progeen is fully able to complete a variety of construction works such as civil and industrial buildings in reinforced concrete or steel structures. Infrastructural works, overhead lines, water supply systems etc.

PERMITS & DOCUMENTATION

Preliminary procedures

The company handles and prepares all required documentation required for the building permits like environmental study, geological survey, land survey etc. After applying for different development or construction permits, the company will monitor all the processes until the end of the project.

LATEST COMPLETED PROJECTS

Few of our latest construction projects

ALEAT CENTRAL SITE

Reconstruction works for

The building is an existing service building in the eastern part of Tirana and it functions as a facility for producing the Albanian biometric passports. The reconstruction works were carried out with highest construction standards in order for the facility to acquire all necessary certifications due to its special function.

ASHRAF 3- OFFICE BUILDINGS

11 buildings for the Iranian Community

Progeen built 11 buildings for the Iranian Exiled Opposition living in Albania. The buildings offer comfortable quarters for the people working there. These buildings were part of the ASHRAF 3 project, a small Iranian town which will house the Iranian community in Albania with all the facilities required for a quite living and working.

"IRIS" RESIDENCE

Residential building

A residential building located in the eastern part of Tirana in the "Oxhaku" area besides Progeen 1 Residence. It is a 6-story building designed to offer comfortable living and community life. This building is estimated to be completed in March 2020.

"RRUGA BARDHYL" RESIDENCE

Residential and commercial building

A residential building located only 1km from the center of Tirana. The building is constructed with highest standards of thermal insulation and soundproofing. The facade features ventilated facade system combined with French double glazed windows.

RAINBOW RESIDENCE

Residential Building

Rainbow residence is the newest project the company is carrying out as an investor. The residence consists in two sections and has 9 and 7 floors with one underground floor as a parking area and its ground floor for commercial activities. The building will feature the highest construction standards in Albania for residential buildings.
